INNES BEAN WINDROWER

THE INNES BEAN WINDROWER is the finest tool ever developed to handle dry, edible beans and other crops similarly handled . . . to re-lay windrows of any crop . . . or to use as a hay tedder.

The Innes Bean Windrower has many characteristics to make it the only tool to do the job right, and soon pays for itself. Eleven models to fit all field conditions.

- **Saves labor and time and beans.**
- **Practically eliminates dockage from dirt and stones, cracked, spoiled or specked beans.**
- **Permits faster, more efficient combining, with less damage to combine.**

READ WHAT MANY USERS SAY

MICHIGAN

Michigan Bean Commission Honors Innes Company Recognition Award Made in February, 1968 In its citation for the outstanding contribution to Bean Industry, the Innes Bean Windrower was called the "greatest single contribution to the development of better equipment for bean growers that has been introduced in 20 years."

"In doing custom work, I run into all kinds of conditions. I used to get stones in my combine about one every 80 rods — back of the Innes Windrower I got none. **I wouldn't run anybody's beans anymore without first windrowing with an Innes."**

✻ **"We had to get an Innes Bean Windrower to keep down costs."**

"I work alone in beans, and it sure saved a lot of time."

"No twisting or bunchings — dirt and stone free, allowing for faster and trouble-free threshing."

✻ **"This is our third machine. I don't know of any other machine that I have bought that saved so much time and work. I wouldn't think of raising beans without an Innes Bean Windrower."**

"I relayed the windrow with the Innes Bean Windrower, after a rain — puts beans back in good rows, same as first time."

✻ **"I have used the Innes Bean Windrower for the past eight years."**

✻ **"A big saving to me. Once over, and the job is complete — no hand labor, beans dry faster, combines easier and no dirt or stones . . . I don't know what I would do without one."**

"Handles them quickly and doesn't shell them."

"This is my third Innes Bean Windrower — I would not be without one."

✻ **"No stones since buying my first Windrower 8 years ago."**

"No stones — beans set with the pods up and less chance for spoiling."

✻ **"Used it to relay windrows of barley and oats, as well as beans."**

"Have used an Innes Windrower for 14 years, and hardly know how to use a fork in beans anymore."

✻ **"I used to hire two men to shake beans — not any more."**

✻ **"Windrows not likely to roll in strong wind."**

"We like it — this is our third one."

✻ **"One man can do the work of two — better, faster, easier."**

"We could combine a lot faster; also, the Windrower doesn't shell beans."

"It saves one man and tractor, plus one operation."

"Don't know how we did without it . It is wonderful."

"I traded my 1961 Innes Bean Windrower for a 1966 Model. The old one gave me good service, was still in good condition, and I got a good trade-in price."

✻ **"We definitely know that on 30 acres of beans we have this year, we saved on handling and waste the cost of the machine."**

"I would not use a rake again. We have two Innes Bean Windrowers. The beans dry faster, less pick and a lot easier on the combine."

"It is a machine that Growers should have had years ago."

✻ **"Wind does not roll the windrows, and they are not in a rope like they are from a rake."**

"This is my second one — and pulled over 2000 acres of beans."

CALIFORNIA

✻ **"The Greatest thing that has ever happened to bean harvesting."**

"Combine faster and more efficiently — windrows free from dirt and stone — less damage by wind and rain."

"Saves labor — and less dirt in windrow."

"It does a perfect job."

✻ **"The Innes Bean Windrower reduced my tare from 40% to less than 5%."**

CANADA

"Beans free of dirt, and easier for combine to harvest."

✻ **"Sell one to my neighbors, so they will leave me alone!"**

"I do custom combining and bought the Innes Bean Windrower to lend to customers to make combining easier and more efficient."

✻ **"Almost 100% free of dirt and stones. Repairs to machine were nil."**

"I found I didn't have no problems getting a custom combine."

✻ **"Saves labor — one man took place of two."**

"Faster drying — less tare — less loss of beans — faster harvest."

COLORADO

"Lays beans back flat — no wind damage — very little shattering."

✻ **"Less dirt and damage from wind and rain."**

✻ **"It paid for itself in one crop — by saving damage."**

"We used the Innes Windrower to re-lay grain windrows."

"Less Tare."

KANSAS

"Windrows dry faster and combine more efficiently. Windrows free from dirt and stones — and less wind damage."

MAINE

"Cleaner beans from combine."

* **"Handles beans with less shattering and leaves them fluffy to dry faster."**

MINNESOTA

"I pull and windrow in one operation — less dirt."

MONTANA

"Less wind damage and less bean loss."

* **"Beans are up off wet ground — fluffs up windrow and dries faster — combine faster and more efficiently."**

NEBRASKA

* **"Easier to combine, and wind does not move windrows."**

"I have used one for the past fifteen years."

"It is really a nice machine — and works 100%."

* **"Did not shell beans when cutting — eliminated one man and one tractor."**

"Cleaner beans and a lot easier on the combine."

"Cleaner beans — less chance of beans blowing from winds."

"Less dirt — less chance of rolling from wind — windrows dry faster."

* **"The only way to handle beans is with the Innes Bean Windrower."**

"Eliminated a hired man and a tractor."

"Used it to re-lay a hay windrow."

"It is the only way to handle beans."

NEW YORK

* **"One of the finest machines to save labor I have ever seen."**

"Less hand work — cleaner threshing — less pick — faster harvesting."

"This machine was the best investment I have made."

* **"Much faster than two rakes — less roping and twisting."**

"Combine 50% faster."

* **"The windrower cuts bean loss — eliminates rocks — gets dirt off roots — beans dry faster, and pick up easier. It cuts my bean harvesting time in half. If I had not had a Bean Windrower this year, I would have lost most of my beans."**

"I combine twice to three times faster." His wife said, "P.S. — I am especially pleased, as I do not have to shake beans any more!"

"I am pleased with the way this machine has operated this fall. It has done an excellent job in most difficult conditions. I consider it a must!"

"Makes combining a pleasure — I was so pleased with the Innes Pick-Up, I wanted to try another of your fine products."

* **"Windrows stay better in a heavy wind. We threshed all our beans without one stone in combine. I have owned one of your old Windrowers for years, and still have it and use it."**

* **"We can't begin to tell you how much time the Windrower saved over the side rake. It did not injure the pods like a side rake would — we would hate to be without this machine now."**

"Removes dirt and stones — big saving on harvesting machine."

* **"I don't think I ever bought a machine where I got so much for my money. I just can't say enough for it. No stones or dirt — faster work — less breakdowns."**

"When we get in adverse conditions, it still works."

"Handled 1,115 acres this year. Beans left loose and not wrapped — thresh much better."

"Speeds combining, and a lot less damage to combine."

* **"A big help to custom combine operators — I would not combine a bean unless windrow was made from an Innes Bean Winrower."**

NORTH DAKOTA

"We used it to re-lay grain swath after a rain."

"Lifts beans out of the dirt."

WYOMING

"Eliminates dirt and rock, and aids the combining operation."

"Less wind and rock damage."

"Faster combining — less dirt and stones — less damage from wind and rain."

* **"Dry so much nicer after a rain."**

* **"Less dirt and beans cure better, and they do not move in the wind."**

...and to complete your bean harvesting, be sure your Combine is fitted with an Innes Pick-up and Straw Chopper

EXTRA W-I-D-E floating PICK-UP

. . . the Pick-Up, with models up to 172″ wide, specifically engineered to feed today's high-capacity, higher-performance combines.

Thorough pick-up gets all the beans in the windrow. Gentle handling saves the beans you raise.

PRECISION MADE STRAW CHOPPER

. . . a rugged, full-capacity unit that takes less power all the while it's doing a better shredding and spreading job.

Handles toughest bean straw with power, capacity, performance to spare.
